

Trying to stifle the airwaves over traffic and weather issues is completely assinine! Find another issue - such as the cussing and explotation in rap/rock music. The weather and traffic issues are something everyone can use and is important to - unlike a particular genre of music.

Here in Jacksonville, FL there are two country music stations and they are both owned by the same company. This means tey play the same music - literally - about 5 mins apart! I have stopped listening to local radio because of issues like this. The radio stations here are horrible. Now, I listen to XM radio, here what I want - anywhere in the united states and get different traffic and weather for the places I travel.

Just because a satellite radio company chooses to give weather and traffic announcements, it does not take away anything, person, or money from the local stations. If anything the satellite company could raise their fees. But they do not - now that is a service. Please do not take this away!

Feel free to contact me if you want to rebutte anything I have said or have any information that I should now to help me make a better decision... This is a perfect example of our government at work...

Sincerely
Sonya Chance-davis
